Dear Ms. Jackson,

This is Kurt Anderson, Director of Environmental and Land Management for ALLETE. I participated in the conference call on November 10, 2016, regarding the draft listing of Taconite Harbor's landfill on the EPA's open dump list, along with Lyssa Supinski and Brett Ballavance. Based on that call and previous correspondence you've had with Brett, we have compiled a response and additional information for your consideration in the attached document. Based on the information and language in the CCR Rule, we continue to feel that the Taconite Harbor landfill is an inactive landfill, and is therefore exempt from the CCR requirements.

As I indicated to you on the phone last week, ALLETE takes our environmental responsibilities very seriously, and I welcome further discussion with yourself and other EPA staff to resolve this issue before the Agency takes further action. Please feel free to contact myself or Brett directly after you have a chance to review the attached information.

Respectfully,

Kurt

Kurt Anderson

[ALERT – External Email – Handle Accordingly]

That should work...I never heard back from you on that so wasn't sure.

I think we were going to push it to 3:30 your time to give Lyssa time to get off the plane. That work?
